

COMMUNITY BOATING CENTER
INDIA POINT PARK, PROVIDENCE

CleanGreen – Green Product Integration Into Community Boating Center Skill Levels

CBC instructors model key environmental concepts for CBC skill levels. Together, we're enhancing success with reusable water bottles, Zip2 water stations, and recycling initiatives by "normalizing" green products in our program.

Thank you to [Jamestown Distributors](#) for continued green product support and guidance.

1

1 – Green – SeaSteward

Going green starts ashore. SeaStewards explore how the environmental choices we make on land affect our impact on the sea.

Wash/Wax Products

Applying wax before launch saves water by requiring less frequent washing.

Orpine Wash & Wax

Removes salt and dirt while providing a coat of wax protection.

Starbrite

Sea Safe Boat Wash & Wax

Cleans, shines, and protects boat finishes in one easy step. Leaves a protective coat of wax on the surface for long-lasting protection.

2

2 – Blue – WaterWatcher

Water covers over 70% of our planet. WaterWatchers embrace the science of the sea and help protect it from seen and unseen threats.

Marine Cleaners

Smart cleaner choices minimize harsh chemicals introduced into the ocean.

Brite Wash

Environmentally safe, concentrated wash soap.

Starbrite

Sea Safe Boat Wash

Phosphate-free & approved for inland lake use due its "green" properties.

TotalBoat Marine Soap

100% biodegradable & strong enough to remove droppings and harbor scum.

3

3 – Yellow – SailingStar

Global climate change affects local sailors. SailingStars have an interest in how current behaviors affect future outcomes.

Spill Prevention

Minimizing petroleum use & keeping gas/oil out of oceans is key to our future.

StarBrite Bilge Pads

Great for cleaning up fuel or oil spills at the filling dock, engine rooms, or bilges.

Oil Sorbent Materials

Put in place before you change your oil or use to clean small spills.

ChemTex Sorbent Pillow

Used to absorb large amounts of fluids where a pad just is not enough.

4

4 – Orange - Instructor

Teaching is much more than sharing skills. Instructors serve as key environmental mentors & refine & explore skills and career paths.

Fabricating & Maintenance

Boatbuilding and related trades need environmental literate workers to succeed.

Entropy Resin

Industry's first USDA BioPreferred Certified liquid epoxy resin product w/ high bio-renewable content.

Pah-Nol

Non-Toxic Antifreeze

Non toxic, environmentally friendly propylene glycol antifreeze formula contains corrosion inhibitors.

5

5 – Red – Racer

A "need for speed" hooks sailors for life. Racers are the ultimate ambassadors for sailing and protecting the waters we all sail on.

Anti-Fouling Bottom Paint

Heavy metals like Copper used in many bottom paints hurt the environment.

TotalBoat Krypton

Copper-free, it provides excellent protection from algae, shell, & weed fouling. Uses Ecomea to ward off barnacles and zebra mussels, and a unique zinc biocide to combat slime.

TotalBoat JD Select

This water-based ablative is low in VOCs and can be sprayed or brushed for a smooth, fuel-efficient finish.
